Pin Cylinders *CJP2/CJP Series* Ø4, Ø6, Ø10, Ø15, Ø16

2 auto switches can even be mounted on a cylinder with ø4 bore size (5 mm stroke).

Double acting / CJP2 Series

Small and Light

C

Double acting/CJP2 Series

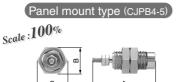

- Full length: Shortened by 6 to 9.5 mm
- Weight: Reduced by 55 to 65%

New aluminum body is light weight compared with the current CJP series. (Compared with the basic model CJP cylinder without auto switch)

Dimensior	Unit: mm

Moisture Control Tube **IDK Series**

When operating an actuator with a small diameter and a short stroke at a high frequency, the dew condensation (water droplet) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the Web Catalog.

Specifications

Action		Double acting, Single rod		
Maximum operating pressure		0.7 MPa		
Minimum Ø4		0.15 MPa		
operating	ø 6	0.12 MPa		
pressure	ø10, ø16	0.06 MPa		
Proof pressure		1 MPa		
Ambient and fle temperature	uid	Without auto switch: -10 to 70°C With auto switch: -10 to 60°C (No freezing)

Allowable Kinetic Energy

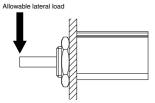

▲Caution

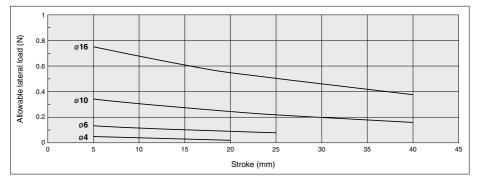

When driving an inertial load, operate a cylinder with kinetic energy within the allowable value. The range in the chart below that is delineated by bold solid lines indicates the relation between load mass and maximum driving speeds.

Allowable Lateral Load

Strictly observe the limiting range of lateral load on a piston rod. (Refer to the below graph.) If this product is used beyond the limits, it may shorten the machine life or cause damage.

2	5	10

Watchmaker's screwdriver

- ① Fit an auto switch into the auto switch mounting groove to set it roughly to the mounting position for an auto switch.
- 2 After reconfirming the detecting position, tighten the auto switch mounting screw* to secure the auto switch.
- ③ Modification of the detecting position should be made in the condition of ①.
- * When tightening an auto switch mounting screw, use a watchmaker's screwdriver with a handle of approximately 5 to 6 mm in diameter.

(Use a tightening torque of approximately 0.10 to 0.20 N · m.)

Tightening torgue for auto switch

mounting screw	(N·m)
Auto switch model	Tightening torque
D-M9□(V) D-M9□W(V) D-A93	0.05 to 0.15
D-M9□A(V)	0.05 to 0.10
D-A9□(V)(Excludes the D-A93)	0.10 to 0.20

Specific Product Precautions Æ

-----Before handling auto switches, refer to pages 26 to 30 for Auto Switches Precautions.

✓ Caution

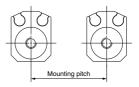

1. If auto switch cylinders are used in parallel, keep the distance between cylinders in accordance with the below chart.

(mm)

Mounting Pitch

Auto switch model	Bore size				
Auto switch model	4	6	10	16	
D-A9□(V)	-	20	25	30	
D-M9□(V) D-M9□W(V) D-M9□A(V)	25	25	30	35	

Use caution not to use them, getting closer than the specified pitch. Otherwise, it may cause auto switch to malfunction.

CJP2 Series **Made to Order: Individual Specifications** Please contact SMC for detailed dimensions, specifications and lead times.

1 Clevis / Trunnion Type Mounting Interchangeable

Symbol -X1666

CJP2 series standard model no. - X1666

Clevis / Trunnion type mounting interchangeable (Former CJP)

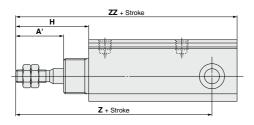

Specifications

Applicable series	CJP2		
Bore size	ø6, ø10, ø16		
Other specifications	Same as standard type.		

* ø6 is available for both standard and built-in magnet types.

* ø10 and ø16 are available for the standard type (The built-in magnet type is interchangeable.)

Dimensions

Bore size(mm)	A'	н	z	ZZ
6	18.5 (13.5)	26.5 (21.5)	43.5	47.5
10	17	25	49	55.5
16	19	29	53	63

* Dimensions other than above are same as basic type.

(): For the built-in magnet type

CJP2 Series Specific Product Precautions

Be sure to read this before handling the products. Refer to page 20 for safety instructions and pages 21 to 30 for actuator and auto switch precautions.

Mounting

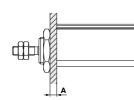

ACaution

Mounting nut maximum tightening torque and panel width

 Do not apply more torque than the maximum torque range when mounting the cylinder or bracket. Also, do not attach a panel with a thickness beyond the specified range.

Cylinder bore size	Thread	Maximum tightening torque (N·m)	A dimension maximum value (mm)
ø 4	M8 x 1	6.2	3
ø 6	M10 x 1	12.5	4
ø 10	M12 x 1	21.0	4
ø16	M14 x 1	34.0	5

Panel mounting

Foot mounting

Panel maximum thickness

Flange mounting

Piping

ACaution

The piping port size of CJ2 \Box 6 and CJP2 \Box 10 is M3 x 0.5. If using piping tube O.D. Ø6, piping is possible on M3 One-touch fittings (applicable tube O.D. Ø4) when used with a reducer (KQ2R06-04A).

* For details of One-touch fittings, refer to the Web Catalog.

② Do not apply more tightening torque than the below specified range when attaching a load on the rod end, rod end cap, single or double knuckle joint.

Applicable bore size	Thread size	Maximum tightening torque (N·m)
ø 4	M2 x 0.4	0.1
ø 6	M3 x 0.5	0.3
ø10	M4 x 0.7	0.8
ø16	M5 x 0.8	1.6

Rod end load mounting

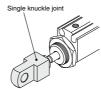

Rod end cap (flat type)

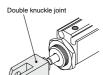

Rod end cap (round type)

Rod end cap (flat type) mounting

Rod end cap (round type) mounting

Single knuckle joint mounting

Double knuckle joint mounting

Disassembly and Maintenance

▲ Caution

Snap ring installation / removal

 To replace seals or grease the cylinder during maintenance, use an appropriate pair of pliers (tool for installing a C-type retaining ring for hole).

After re-installing the cylinder, make sure that the retaining ring is placed securely in the groove before supplying air.

2. To remove and install the retaining ring for the knuckle pin or the trunnion pin, use an appropriate pair of pliers (tool for installing a C-type retaining ring for hole). In particular, use a pair of ultra-mini pliers, for removing and installing the retaining rings on the ø6 cylinder.

Do not disassemble the CJP4 cylinder. Do not loosen or remove the head cover.

Pin Cylinder: Single Acting, Spring Return **CJP Series** Ø4, Ø6, Ø10, Ø15

A short stroke miniature cylinder with a shorter overall length.

The installation space can be significantly reduced because this cylinder can be recessed directly into a machine body or installed on a panel. Thus, the machine can be made more compact.

Embedded type

Panel mount type

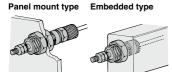

Symbol

Single acting, Spring return

Symbol	Specifications
XC17	Pin cylinder with rod quenched
XC22	Fluororubber seals

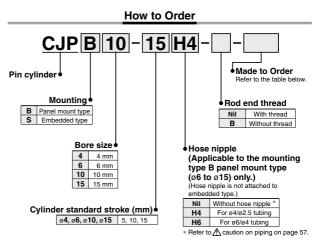

Mounting

Moisture Control Tube IDK Series

When operating an actuator with a small diameter and a short stroke at a high frequency, the dew condensation (water droplet) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the Web Catalog.

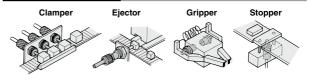

Specifications

Action		Single acting, Spring return

Allowable Kinetic Energy

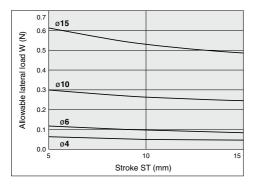

A Caution

When driving an inertial load, operate a cylinder with kinetic energy within the allowable value. The range in the chart below that is delineated by bold solid lines indicates the relation between load mass and maximum driving speeds.

Allowable Lateral Load

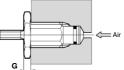

Strictly observe the limiting range of lateral load on a piston rod. (Refer to the below graph.) If this product is used beyond the limits, it may shorten the machine life or cause damage.

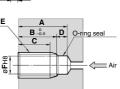

CJP Series

CJP Series Specific Product Precautions

Be sure to read this before handling the products. Refer to page 20 for safety instructions and pages 21 to 30 for actuator and auto switch precautions.

Piping

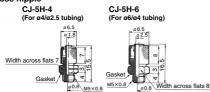

▲ Caution

The following fittings are recommended for this cylinder connection. However, there may be a case where the piston speed exceeds 500 mm/sec. even with the recommended fittings for this cylinder. Use a speed controller in such cases.

Cylinder bore size	Applicable bore size	Fitting type	Connection thread	Model
ø4		One-touch fitting	M3 x 0.5	KQ2□02-M3G
Ø6 Ø10 Ø15	ø2	Miniature fitting	W3 X U.S	M-3AU-2
	02	One-touch fitting		KQ2D02-M5N
		Miniature fitting	M5 x 0.8	M-5AU-2
	ø4/2.5	Dedicated hose nipple	IVIO X 0.0	CJ-5H-4
	ø6/4	(with fixed orifice)		CJ-5H-6

 Please be aware that cylinder speed may slow down on the retracting side when using the above one-touch fittings and miniature fittings with a cylinder bore size of o15.

Hose nipple

In addition to the above fittings and hose nipples, the below fittings can also be attached to the cylinder. When using the below fittings be sure to provide a speed controller after adjusting it to 500 mm/s or less.

Cylinder bore size	Applicable bore size	Fitting type	Connection thread	Model
ø4	3.2		M3 x 0.5	KQ2□23-M3G
Ø4	4		W3 X 0.5	KQ2□04-M3G
ø6	3.2	One-touch fitting		KQ2□23-M5□
ø10 ø15	4	intanig	M5 x 0.8	KQ2□04-M5□
	6			KQ2□06-M5□

Recommended Speed Controller

Ø3.2	M5	AS1211F-M5E-23A	AS1311F-M5E-23A	A31002F=23						
ø4	M3	AS1211F-M3-04	AS1311F-M3-04	AS1002F-04						
04	M5	AS1211F-M5E-04A	AS1311F-M5E-04A	A31002F-04						
ø6	M5	AS1211F-M5E-06A	AS1311F-M5E-06A	AS1002F-06						

 For details about one-touch fittings, miniature fittings and speed controllers (applicable tubing O.D. e2 only), refer to the Web Catalog.

Also, for details about speed controllers (applicable tubing O.D. ø3.2 to ø6), refer to the Web Catalog.

 Refer to the Fittings and Tubing Precautions (Web Catalog) for how to handle onetouch fittings.

Mounting

▲ Caution

Do not use it in such a way that a load could be applied to the piston rod during the retraction.

The spring that is built into the cylinder provides only enough force to retract the piston rod. Thus, if a load is applied, the piston rod may not be able to retract to the end of the stroke.
